

**INTRODUCING THE NEW
ADJUSTABLE ERGONOMIC TABLE.**

**Because One
Size Does
Not Fit All.**

You can do it all with the Universal Adjustable Ergonomic Table.

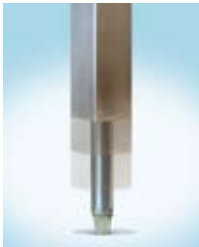

For all kinds of businesses, the introduction of ergonomics has proven to generate profound and positive benefits to safety, productivity and profitability. And now, with the introduction of the new Universal Stainless Steel Ergonomic Adjustable Table, SPG brings all of those same benefits to your kitchen.

Designed with a fold-away crank, the surface can be raised or lowered quickly and easily. As a result, the innovative ergonomic design of this table:

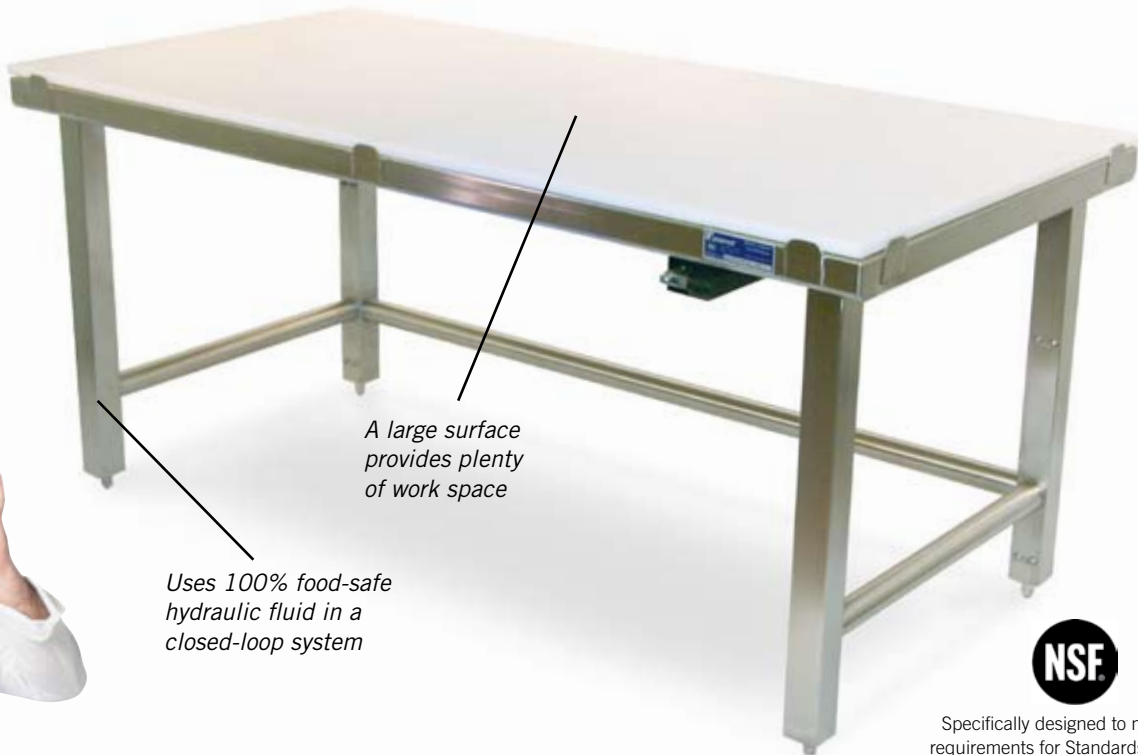

- Provides a customized fit for each employee, rather than a one-size-fits-all solution ill-adapted to both the employees and the tasks at hand
- Puts less stress on employees’ musculoskeletal, nervous and neurovascular systems
- Reduces injury and fatigue that lead to missed days, extended recovery times and employee turnover due to job-related injury and stress
- Cuts the number and dollar value of Workers Compensation claims

Quickly, easily adjust table surface to heights between 30" and 42"

Available with either adjustable bullet feet or casters

A large surface provides plenty of work space

Uses 100% food-safe hydraulic fluid in a closed-loop system

Specifically designed to meet NSF requirements for Standards 2 and 51

The new Universal Stainless Steel Ergonomic Adjustable Table isn’t just about avoiding costs, it’s also about improving efficiency and profitability by:

- Increasing staff productivity with equipment designed to maximize speed and accuracy
- Reducing service time and earning customer satisfaction while earning employee loyalty
- Allowing you to customize your work environment with a wide array of options, lengths and widths

Consider the advantages this table provides — and that the sooner you put it to work, the faster your employees will feel the ergonomic benefits ... and the quicker you’ll begin to enjoy the economic advantages.

PART NUMBER	L & W	WORKING SURFACE
48SLCA12-30	48" x 30"	301 Stainless Steel Tops/Pans
48MCTA12-30	48" x 30"	Poly Top & Tabs Added

The Economics Of Ergonomics.

No doubt, as a food service or restaurant professional you've already had to cope with economic, operational and staffing difficulties from work-related injuries. These statistics from OSHA and health publications show you are not alone:

- Each year, 1.8 million U.S. workers report work-related ergonomic disorders — one third of which require taking time off for recovery
- Ergonomic disorders account for more than one third of all lost-work injuries and illnesses
- Total direct costs for occupational ergonomic disorders are estimated at \$50 billion

Universal
stainless

What's more, these figures are expected to rise dramatically due to the aging workforce and escalating healthcare costs. The use of ergonomically designed equipment will go a long way to protect the health of older workers — and the bottom line of your business.
