SPG™
STORAGE PRODUCTS GROUP

Raising the bar for quality equipment, while lowering the total cost of ownership.

The SPG name has only been around since 2010, however the product lines that comprise our company have been among the most well-known and respected names in the foodservice business for nearly six decades. Individually, each of the product lines below brings unique expertise, capabilities and quality to foodservice operations. Together, they offer you a total turnkey solution.

AMCO®: The industry leader in premium shelving, equipment and accessories that utilize an ultra-strong square-post system.

ISS™: Strong, versatile wire-based shelving, wall storage systems, carts, racks, dollies, workstations and more.

ISS Contender™: The industry's workhorse in wire shelving and accessories — the ideal choice for general applications.

Freestyle®: Strong, versatile and space-efficient, Freestyle® freestanding cantilever shelving and workstations provide maximum performance for every area of your operations.

Kelmax: The gold standard in aluminum equipment — from storage and transport to specialty items for everything from produce and bakery to material handling.

Universal® Stainless: The stainless steel fabrication specialists — offering a vast array of sinks, tables, cabinets, shelves, racks, stands, counters and more.

Gillis & Jarke®: SPG's two material handling lines deliver equipment that's tough, durable, innovative, efficient and economical.

Together, the SPG product lines create unique synergies and efficiencies that enable SPG to deliver an extraordinary array of service and products to your organization. With the broadest selection of foodservice equipment available anywhere, only SPG can offer you so many choices that lead to greater productivity, profitability, performance — and the lowest cost of ownership.

Optimizing the performance and efficiency of your operation.

Nobody offers you more choices in storage equipment, or better ways to optimize the productivity and value of your space, personnel and investment.

SPG storage solutions are specifically designed to not only help you put more into every square foot, but they're also easier to access, clean and assemble. Whether it's in the food prep, drive-thru or any other area of your operation, SPG equipment is designed to fit your space, and the way you do business — reducing the time, motion and effort your staff needs to complete a task. And SPG products are built to be stronger — and last longer — by virtue of the strict manufacturing processes we employ and the quality and amount of material we put into each product.

If you want to get more out of your equipment, contact your SPG representative to see all we can do to optimize your foodservice operation.

SPG
STORAGE PRODUCTS GROUP

You'll find a lot of amazing products in this catalog.

But only a fraction of the amazing products we make.

As you look through these pages, bear in mind that the products shown are representative of the far greater number of solutions we offer. For any item you see, there may be dozens, hundreds — or even thousands — of additional products we can provide. SPG offers different sizes, materials, finishes, configurations and accessories to ensure you get the equipment that best fits your needs and your business.

If you don't see exactly what you want in these pages, ask your SPG representative about it. With the broadest selection of foodservice equipment, chances are we already make whatever you're looking for — and can provide it to you through your SPG representative.

For customer service and more information, contact us toll-free:

NSF®

SPG's foodservice products are all manufactured to meet NSF standards. For specific items, visit www.nsf.org

You **Tube**   http://www.youtube.com/user/StorageProductsGroup

By creating efficiencies in our organization we can bring them to yours.

At SPG, every product we offer is designed and manufactured to provide immediate value when you buy it, and to continuously accelerate and maximize your ROI over time. To achieve this, we follow a strict, formalized process that results in the lowest cost of ownership for our customers, and that can only be achieved by a holistic approach that addresses three areas.

1. Quality Manufacturing

Incorporating best practices in manufacturing and quality control, we continually seek new efficiencies in production to drive out cost. At the same time, we use only high-quality material in our equipment — and we use more of it — to ensure our products hold more, last longer and provide enduring value.

From start to finish, SPG's adheres to best practices in manufacturing and quality control to ensure excellent performance, enduring service and customer satisfaction.

The SPG Difference

Here's just a brief checklist of some of the ways SPG goes over and above our competitors to add value and lower the cost of ownership.
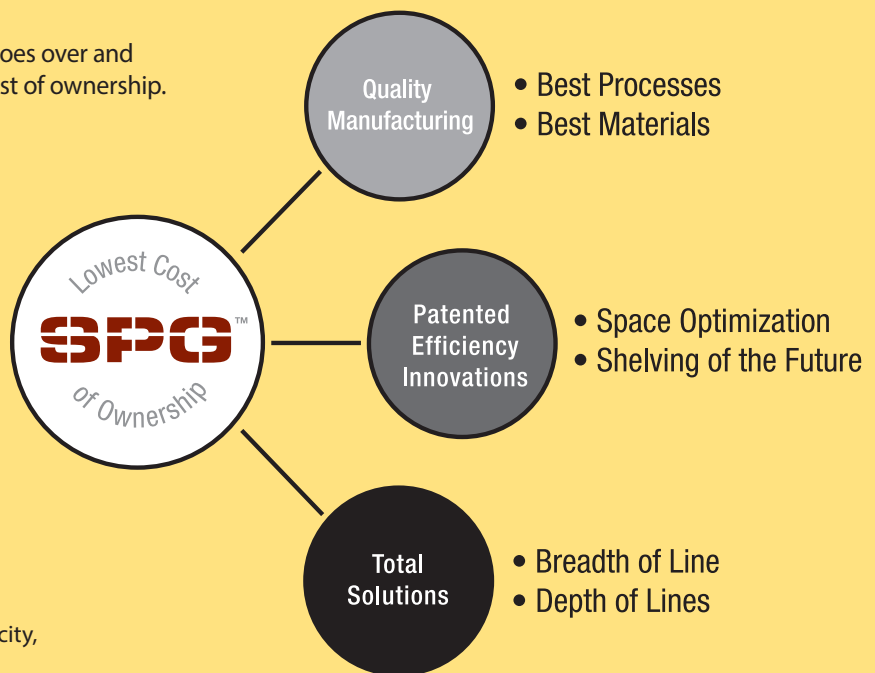

We Use More And Better Materials

• Premium 300 Series stainless steel
• Stronger welds
• More metal at key stress points
• 27% more metal in our AMCO® shelving posts
• Full-metal thickness throughout our sink bowls

We Offer Exclusive Patented Innovation

• Award-winning ergonomics
• Cooler/freezer capacity gains of 30% - 68%
• A pan rack with a 50% smaller storage footprint

We Deliver Total Solutions

• The broadest selection of storage products
• More choices to create custom solutions
• Consultative design services to maximize storage capacity, space utilization, staff productivity and more

Lowest Cost of Ownership

SPG
STORAGE PRODUCTS GROUP

2. Patented Efficiency Innovations

Using input from customers, our products are designed by an elite engineering team using sophisticated tools. As a result, our products are fast and easy to set up... inventory is easier to access space is optimized...staff productivity is increased...and our scalable solutions can be reconfigured to meet your future needs.

The patented design of our Collapsible Nesting Mobile Pan Rack has won industry recognition for innovation and efficiency.

3. Total Solutions

Beyond our vast selection of equipment, SPG offers customized sizes and solutions…site design and consultative services…and the experience and technical expertise to help you get the most out of your space, your people and your investment.

SPG's products and solutions deliver operational efficiencies (See pages 6-7 for details.

An uncompromising commitment to quality...exclusive leading-edge innovation...and the industry's widest selection of products—it all comes together to provide your business with the ultimate in storage solutions and the lowest cost of ownership. And we back it with the best guarantee in the business.

SPG is a US based manufacturer with strategic global partnerships to serve the needs of multi-national brands. All SPG partners meet or exceed worldwide social, economic and environmental standards.

There are opportunities everywhere in your operation. We'll help you find them.

While we are happy to sell a customer a single piece of equipment, the real value we provide is our ability to analyze your operation and design a comprehensive solution customized to your unique needs. Working with you, we'll help you uncover the hidden opportunities that exist in your facilities. Then, we'll help you select the right systems and integrate them into your operation in a way that increases workflow, maximizes storage capacity, improves employee productivity, cuts costs and increases profitability.

We can offer you these services because SPG manufactures the widest selection of equipment solutions on the market. And, we match that selection with years of proven experience.

Our comprehensive product selection can provide an integrated system that encompasses every facet of your operations. From the backroom to the bakery to the bar...from the drive-thru to the dish and dry storage areas...we'll put together the equipment — and a comprehensive plan — that will help you maximize the efficiency and performance of your business.

Sample Foodservice Floor Plan

Here's an illustration of the breadth of products we provide —
and an example of the type of unified, highly efficient layout we can design for you.

SPG Innovation. Improving the performance of our foodservice equipment and the businesses who use it.

At SPG, we don't just build storage equipment, we create opportunities to help our customers become more efficient, productive and profitable. We accomplish that through the innovative manufacturing processes we have developed to minimize costs while maximizing quality — and by the innovative designs you'll find throughout all of the SPG product lines.

On these pages, you'll find just a few of the many ways SPG engineering and design have made a profound and profitable impact on the bottom line performance of our customers.

Improved productivity: SPG's Universal Stainless Adjustable Ergonomic Table and our Ergonomic Deli Slicer Table (Page 54) improve staff efficiency by providing a work surface that's customizable to the height and preferences of each employee.

Maximized space: The unique design of our Collapsible Nesting Mobile Pan Rack (Page 48) not only reduces the storage footprint by 50%, it also allows one person to move multiple units quickly and easily.

Look for this logo throughout the catalog — it signifies innovative design that's only available from SPG.

SPG ™
STORAGE PRODUCTS GROUP

Creating value in every area of your operation.

Cut costs: In-store tests show SPG Freestyle® shelving (Page 24) has proven to provide more capacity in less space — lowering investment cost by increasing usable storage surface space in coolers by up to 68% and in freezers by up to 60%.

Increased capacity: Our new Freestyle® brace (Page 25) increases the load capacities of Freestyle® shelving even more — by up to 42% for the storage and display of heavy, high-density products.

Enhanced Versatility: The flexible design of the Kelmax Rocket Cart (Page 42) makes it a workhorse for moving all types of goods in all types of applications.

Strength, durability, performance and the lowest cost of ownership — it's what you'll find in every SPG product.

Food Transport/Delivery	42-46, 48-51
Front Counter	55, 62, 64, 65

SPG offers the broadest range of storage systems in the market, and we continue to add to your choices with intelligently designed products to help you run a more efficient and profitable foodservice operation.

How to choose shelving

The right shelving system will provide you with the perfect combination of performance, features, benefits, longevity and efficiency. Following is a short primer on how to select and customize a shelving system that will fulfill your needs and provide your business with the lowest cost of ownership. When choosing shelving, consider:

Type of Material: SPG manufactures shelving in a wide range of material. Each has its own unique advantages: including wire, stainless steel, steel, aluminum, and plastic.

Wire: Strong, economical shelving systems for a wide range of environments

Stainless Steel: Natural corrosion resistance and strength for both dry storage and harsh high-moisture environments

Steel: Heavy-duty — with a variety of coatings for every area

Aluminum: Strong, lightweight and never rusts —it's the perfect solution for caustic applications and harsh environments. And it's the ideal material for both hot and cold environments

Plastic: Durable, rust-free and easy to clean — an economical solution for cooler/freezer use, as well as dry storage

The environment. Cooler and freezer applications require corrosion prevention — aluminum, stainless steel and plastic are naturally rust resistant. However, SPG has special finishes for our wire shelving that provide a surface that's both extremely durable and rust resistant. All SPG shelving will perform excellently in dry environments — and all are NSF approved.

Finishes	Description	
Plating Plus™	A 3-step process that includes: 1. Zinc plating 2. Rust-inhibiting chromate seal 3. Clear lacquer NSF approved	
Contender Grey™	Dark Grey	All SPG proprietary polymer coatings have 3-step process over plating quality steel wire:
Polygard®(Blue)	Blue	1. Zinc plating 2. Rust inhibiting chromate seal 3. Electrostatically applied baked-on antimicrobial polymer coating
Grey Bond®	Light Grey	
Gold Bond®	Gold	
		All are NSF approved for food and splash zones
Stainless Steel	An electro-polishing treatment is applied to surface of 300 Series Stainless Steel. NSF approved for all environments.	
Aluminum	Lightweight and never rusts. NSF approved for all environments.	

SPG
STORAGE PRODUCTS GROUP

The space that you can dedicate to storage. If space is limited, you'll want a space-saving solution. Cantilever shelving is an excellent choice because it has no front uprights, so you'll get maximum, uninterrupted space. Shelves that can be easily repositioned can help eliminate wasted space. In coolers and freezers, our Mod-A-Flex®, Freestyle® and Kelmax shelving systems offer built-in and freestanding solutions that can dramatically increase capacity and operational efficiency. High-density and Ultra-density systems provide the ultimate in storage efficiency by minimizing and eliminating wasted aisle space.

Capacity. If you're storing heavy, high-density products like containers of liquids, kitchen equipment or sacks of produce, you'll need stronger shelving units.

Accessibility. Shelving should facilitate access to items that are stocked and restocked on a regular basis. With SPG cantilever shelving, there are no front posts to obstruct reach. And the marine waterfall edge on our ISS™ shelving makes loading and unloading fast, easy and secure.

Future storage needs. To allow for future expansion, choose an SPG scalable system — those with add-on kits that share an upright with the existing unit. This forms a single, structurally strong and continuous unit, and saves space to maximize storage capacity and reduces capital costs.

Additional factors.

Easily removable shelves help your staff clean more thoroughly and more quickly.

A wide selection of available accessories help you maximize shelf utility and staff efficiency.

The color of your shelving can coordinate with your decor and promote your brand identity.

Keep capacity, operational and adaptability efficiencies in mind to optimize your return on investment and maintain lowest cost of ownership.

No matter what your storage needs, SPG has the solution that will help you get more from your shelving investment. Contact your SPG representative today.

AMCO® SHELVING
You'll find amazing strength in our numbers.

Compared to conventional wire shelving, the AMCO II® square-post system uses 27% more metal in our posts...our shelf wire averages 50% greater thickness...our welds are larger and stronger — the design of AMCO II® may be unique, but the commitment to quality is all SPG.

AMCO II® Shelving

- Unique square post design uses 27% more steel for greater strength and durability than typical round post systems
- Frame is 12-ga. solid steel
- Solid 2-1/8" robotic welds provide more stability than the two spot welds used on round post systems
- Shelf wire averages 50% thicker than other systems providing greater shelf capacity and strength
- Shelves come in 5 widths and 8 lengths
- Shelves up to 48" long support up to 1,000 lbs. (450 kg)
- Shelves are available in wire (standard, extra-wide, slanted and inverted with ledge) — plus heavy-duty, 18-ga. solid stainless steel, and plastic (Plasteel® and Plastic Plus®)
- Assembly is fast and easy with a one-piece shelf installation adapter
- Posts are notched on 2" centers to assure perfect shelf alignment every time
- Shelves have solid edges instead of truss edges, making them easier to clean and label
AMCO II® Starter Unit Kits

- Kits come with 4 posts and 4 or 5 shelves.
- Kits are available in 18" and 24" widths, and 64", 72" and 84" heights
- Select finish and add appropriate suffix to model number (see chart)

ISS™ SHELVING
Our most popular shelving for a lot of excellent reasons.

Versatility, innovation, strength — ISS™ brings it all together in a durable line of wire shelving that is both easy-to-assemble and competitively priced. So it's no wonder you'll find ISS™ shelving and accessories contributing to the efficiency and profitability of so many foodservice operations.

ISS™ Shelving

• Durable round post system is interchangeable with other manufacturers' shelving products
• Ideal for most any environment
• Shelves up to 60" long are rated to support 1,250 lbs. of uniformly distributed static weight
• Shelves feature extra trusses for a higher load rating, less deflection and the ability to use longer shelves
• Posts are numbered on 1" increments to speed assembly and ensure more precise shelf alignment
• Our one-piece hinged Sure-Lock™ coupler makes assembly easy and improves stability
• The marine waterfall shelf edge allows easy loading and unloading
• Shelves are available in wire (standard, wide-body, and inverted), dunnage, Series 300 solid stainless steel and plastic
• Four finishes are available — plus designer colors (See finishes on pg 15)

Starter Unit Convenience Packs

• Convenient 4-shelf unit packed in one carton
• Each carton has 4 shelves and four 2-piece split posts to make one 70" post
• Cartons take up minimal warehouse space
• One carton each saves on shipping costs and tracking time
• Ideal for immediate storage needs
• Available in four sizes and two finishes, Gold Bond® (Y) and Plating Plus (C) add finish suffix to model number

SMARTshelf™ SHELVING SYSTEM
Store Merchandising and Retail trade Shelf System

PATENTED DESIGN
STANDARD FEATURES & BENEFITS

- The patented SMARTshelf™ shelving system is easy to assemble - no tools required

- The distance between shelves can be adjusted easily on 1" increments by simply moving the self-aligning support hooks

- Posts will accommodate both adjustable and fixed shelving

- The SMARTshelf™ system has a durable bright plated finish; optional colors available upon request

- Each shelf supports up to 300 lbs.

- Multiple shelf sizes available

ISS CONTENDER™ SHELVING
High-performance. Great value.

With our ISS Contender™ line, SPG has driven down the cost of wire shelving without sacrificing performance. ISS Contender™ offers impressive strength and capacity for general applications, corrosion resistance for all environments, ease of assembly — and just about everything you would expect to find on higher cost shelving.

- ISS Contender™ round post shelving is a strong, economical solution for both dry and refrigerated storage needs
- Available with Plating Plus™ finish for display and dry environments — or Contender Grey™ Epoxy finish which is warranted for seven years against naturally occurring corrosion in high-moisture, high-humidity environments
- Each 48" shelf is rated to support up to 800 lbs. (363 kgs) of uniformly distributed static load weight — longer shelves can support up to 600 lbs. (272 kgs)
- Assembles in minutes without tools or hardware
- Shelves are installed on the posts in 1" (25mm) increments — and can be changed easily as storage needs change

See our line of ISS Contender™ accessories on page 76.

Shelving Kit Convenience Packs

- Four shelves and four 70" split posts
- Available in Plating Plus™ or Contender Grey™ Epoxy finishes

ISS™ NEW ERA™ SHELVING

The same type of quality, durability and performance you'll find in our popular ISS™ wire shelving in a plastic solution — it's one more choice SPG offers, and one more reason to choose SPG as your single source for storage solutions.

- Corrosion free shelves — heavy-duty epoxy coated steel frames and grey polypropylene plastic removable panels
- Antimicrobial agent protects the shelf finishes from bacteria, mold, mildew and fungi that cause odors, stains and product degeneration — keeping shelving cleaner in between cleanings*
- Available in solid and vented styles
- Sectional panels are easy to remove and clean
- Shelves can be used with ISS™ posts and shelving components — stainless steel posts recommended
- No tools or hardware required
- Can be used in all environments from -20°F (-29°C) to 190°F (88°C)
- Load capacity of 1,000 lbs. (455kgs) per shelf of uniformly distributed static weight

* This product does not protect users or others against bacteria, viruses, germs or other disease organisms. It is for the protection of the product only. The antimicrobial product should always be thoroughly cleaned after each use.

Check out our complete line of ISS™ shelving accessories on pages 72 - 75.

AMCO® PLASTIC PLUS® & PLASTEEL® SHELVING

Two great options, one reliable source.

AMCO® Plastic Plus™ solid polypropylene plastic removable panels or Plasteel® steel-reinforced plastic shelves — both offer durable performance in any environment, are compatible with AMCO® accessories and deliver the quality and value that you expect from SPG.

AMCO® Plastic Plus® Shelving

- Grey polypropylene plastic removable panels easily snap onto heavy duty epoxy coated frames
- Sectional panels can be easily removed from frames for cleaning — no tools or hardware required
- An antimicrobial agent protects the finish from bacteria, mold, mildew and fungi that cause odors, stains and product degradation*
- For all environments from -20°F (-29°C) to 190°F (88°C)
- Strength rated to support 1,000 lbs. (455kg) of uniformly loaded static weight per shelf
- Fits standard AMCO® square posts and is compatible with other AMCO® shelving products
- Stainless steel posts recommended for a rust-free solution

* This product does not protect users or others against bacteria, viruses, germs or other disease organisms. It is for the protection of the product only. This antimicrobial product should always be thoroughly cleaned after each use.

KELMAX SHELVING
All the advantages of aluminum, all the quality of SPG.

Synonymous with quality aluminum products, our Kelmax line offers a wide range of choices that are rustproof, lightweight, support up to 1,500 lbs. per shelf and excel in any environment and in any application.

• Aluminum construction offers higher load ratings — so larger loads can be supported across a longer span of shelving
• Aluminum shelving is ideal in hot or caustic applications that might damage the coating of wire shelving
• Kelmax shelving is warranted to be free from manufacturing defects for five years

Kelmax Fixed Shelving Units
• All welded aluminum shelving ships set up
• Overall height is 60" for 2 and 3-shelf units and 72" for 4-shelf unit
• Mitered top for extra strength
• Clearance between shelves:
  Two-shelf unit: 48.5"
  Three-shelf unit: 22.5"
  Four-shelf unit: 18.5"
• Choose from 4 types of shelves

Shelf Selection Guide

Which shelves are right for you? Use this quick reference to help guide your selection:

Solid Shelves: A solid all-around choice — ideal for storage of small items and to contain spills.

Tubular Shelves: Ideal for the storage of cases or large boxes.

T-Bar Shelves: The extra vertical support you need when storing items perpendicularly.

Channel Shelves: Provide extra strength for large or small items, while allowing air circulation.

Freestyle® CANTILEVER SHELVING — the ultimate in freestanding cooler/freezer storage.

In real-store tests, Freestyle® shelving systems increased usable storage surface space up to 68% in coolers and up to 60% in freezers — which makes Freestyle® a proven way to get more out of every square foot of your operation and every dollar of your shelving investment.

- Each shelf has a load-bearing capacity of 600 lbs. with a unit rating of 1,800 lbs. for cantilevered shelves and 1,000 lbs. capacity on the bottom shelf — for a total unit capacity of 2,800 lbs.
- No front uprights — so it offers greater accessibility to inventory
- Increases sq. ft. and cubic volume storage capacity in existing footprint
- Adjustable shelves on 2" increments for maximum flexibility — no tools required
- Unit is fully expandable side-to-side with Add-On unit — using common uprights with dual-side adjustment
- Durable heavy-duty steel construction
- Shelving available in 5 widths and 8 lengths
- Uprights available in 5 heights
- Shelves, uprights, and frame kits have a durable grey epoxy-based finish with advanced antimicrobial protective agent
- Complete assortment of accessories including hanger rails and shelf covers in wire and stainless steel

• Dramatically increases the load capacity of Freestyle® shelving:
 — by 25% on 30-in. shelves, from 600 lbs. to 800 lbs.
 — by 40% on shelves up to 24-in. deep, from 600 lbs. to 1,000 lbs.
• Provides the additional strength critical for the storage and display
  of heavy, high-density products
• Low-profile design and placement make it virtually invisible and
  will not interfere with shelf positioning
• Installation is fast, easy and requires no tools
• Significantly increases the life of your shelving
• Set includes 1 left and 1 right brace for shelf

AMCO® MOD-A-FLEX® SHELVING
Get more out of your coolers & freezers

This unique, patented shelving system is supported from the walls or ceiling, eliminating front posts and increasing storage capacity by 30%. The Mod-A-Flex® system also features an impressive 400-lb. per shelf capacity, an antimicrobial grey-epoxy finish and all the features you need to store more and earn more.

Every detail of the Mod-A-Flex® system is designed to improve employee efficiency, productivity and speed of service — reducing labor and storage costs while contributing to overall operational results.

Mod-A-Flex® not only increases storage capacity up to 30% ... it also offers greater organization and higher visibility of stock... shelves can also be quickly and easily removed and repositioned...and because there are no posts, cleaning the floor is faster, easier and more thorough.

Mod-A-Flex® System

- Designed for walk-in coolers and freezers
- Ceiling mounted — no need to reinforce side walls
- Boosts capacity by up to 30% with the freedom to adjust shelves to the height of the product being stored
- No posts on the floor make cleaning easy
- Shelves can be removed without tools for cleaning
- Easy and fast adjustment of shelves; simply slide the shelf sideways to lift out of current location
- Antimicrobial grey epoxy coating for maximum cleanliness and moisture resistance

MXD85GR	85	2159	13	6

Mod-A-Flex® Standards are available:
In 24", 36", 40", 61" 68", 72", 81" and 85" heights for installation in coolers and freezers
18", 36" and 85" for installation in dry environments
With Extender Kits to increase installation height

The Mod-A-Flex® Secret

The patented secret to this postless system is that standards are securely suspended from the ceiling of the walk-in cooler. This provides the strength assurance that each shelf will support 400 lbs of static weight.
KELMAX ADJUSTABLE
Cantilever shelving

Extraordinary strength and space efficiency combined with easy stock access and exceptional corrosion resistance — they're the traits that elevate Kelmax above the competition and make our cantilever shelving the best choice for your cooler and freezer storage needs.

Kelmax Cantilever Shelving

• Made of heavy-gauge aluminum — which is strong, durable lightweight and never rusts
• The cantilever system is ideal for increasing usable space in coolers and freezers — since there are no front posts, storage is maximized and access is much easier
• Aluminum construction offers higher load ratings — larger loads can be supported across a longer span of shelving
• Available with a choice of channel, tubular and solid shelving
• Aluminum shelving is ideal in hot or caustic applications that might damage the coating of wire shelving

Kelmax Cantilever Fixed Shelving Units

• Includes frame and 2 – 4 fixed shelves (20" or 24" depths)
• For safety, front legs do not extend past the bottom shelf
• Tubular bottom shelf is standard with all kits, and is easily removed without the use of tools for cleaning — all other shelves are fixed and not adjustable or removable
• Clearance between fixed shelves:
  - Two-shelf unit: 59"
  - Three-shelf unit: 28"
  - Four-shelf unit: 18"
• Channel and tubular shelves support 1500 lbs. per shelf — solid shelves support 900 lbs. per shelf
• Freestanding unit — does not require bolting to walls for support

How To Order

1. Choose frame size
2. Choose tubular base dunnage shelf that matches the frame size
3. Choose type of shelf (channel, tubular or solid) and the shelf size
4. Specify the number of shelves

See page 23 for more detailed images and descriptions of channel, tubular and solid shelving.

ISS™ WALL TRAX™
Wall-to-wall efficiency.

Minimize wasted time and motion of your kitchen staff — and increase productivity and service speed! Employing a channel and grid design, the ISS™ Wall Trax™ System ensures the ingredients, tools and utensils your kitchen staff needs are always within easy reach.
ISS™ Wall Trax™ is a complete wall mounted storage solution with specially engineered aluminum channel and grid system to increase efficiency and expand storage capacity.

• ISS™ Wall Trax™ channels and grids are easy to install
• Easily attach accessories without the need for tools or hardware
• All shelves can be moved by simply unhooking from grid or channel
• Available in three finishes, all corrosion-resistant, epoxy-based polymer coated: Grey Bond®, Gold Bond® and Polygard® (Blue)

Use this chart to select your finish

SPG: We Build Better Equipment So You Can Achieve Better Results.

While SPG manufactures shelving, sinks, carts, cabinets, racks, workstations and more, what we really offer you is productivity, efficiency, durability, versatility and performance. You'll find all of this in every product we sell and every service we provide. Beyond our innovative storage systems is a network of service and support that can help you maximize the performance of every square inch of space and every single employee in your facilities.

SPECIALTY SHELVING
Stock more products, more securely.

Whether you're in need of high security shelving to protect against theft, high-density shelving to maximize storage capacity or any other specialized product, you can look to SPG for proven solutions to meet any challenge you may face.

AMCO® Security Shelving

- Lockable wire enclosure limits opportunities to steal, reducing losses due to theft
- Provides a secure area with adjustable shelving for storage of costly items that tend to disappear
- 2"x 2" wire-spacing prevents small goods from being removed
- Door secures at both top and bottom, and handle has hasp design so it can be padlocked (padlock not included)
- Shelves and posts may be ordered in any available finish — enclosure available in Plating Plus™ finish only
- Available in stationary and mobile models — choose from a variety of standard caster offerings

4-Shelf Units

SPG STORAGE PRODUCTS GROUP

Amtrax® II High Density Shelving

Track Length

- High-density shelving that provides a solution to substantially increase storage capacity and utilize available space
- Uses overhead tracks to attach mobile storage units — the track is anchored onto floor-mounted stationary units at each end
- Mobile storage units can be rolled sideways to create a "live aisle" providing access to storage
- Allow 30" for "live aisle"

Add suffix CP for Plating Plus™ finish; add suffix PG for Polygard® (Blue) finish Overhead Track (Available in CP finish only) maximum length 15 feet: Model No. AXTRACK

AMCO II® Ultra Density® Shelving

- Create Ultra Density® mobile storage with any size AMCO® posts and shelves and AMCO II® Ultra Density® casters
- Casters convert from rigid to swivel with foot lever
- When the casters are rigid the AMCO® square post shelving units stay in perfect alignment
- Mobile storage units can be positioned right next to each other and pulled out when needed by switching the caster to swivel
- No overhead track or "live aisle" required
- Increase efficiency and capacity while reducing labor costs
- Shelving ordered separately (AMCO II®, Plastic Plus®, Plasteel® options)

ISS™ EZ Track™ High Density Storage System

- High efficiency storage offers a sliding mobile storage solution to gain additional storage space
- Uses overhead tracks to attach mobile storage units — the track is anchored onto floor mounted stationary units at each end
- Mobile storage units can be rolled sideways
- Utilizes "live aisle" space of 30" to 36" for moving units around and gaining access to storage area

Model No.	Description	Weight (Lbs.)
EZE	Fixed Unit	—
EZM18	Mobile Unit	18
EZM21	Mobile Unit	21
EZM24	Mobile Unit	24
EZT	Track Tube	—
EZJ	Joining Kit	—
CM6EZ	Caster	—

How To Order

- Order shelves and posts separately
- Order one EZE for each stationary unit
- Order one EZM for each mobile unit (Designate width of shelving by ordering EZM18, EZM21 or EZM24)
- Order four CM6EZ casters for each mobile unit
- Order EZT track equal to the total length of the system in even feet (EZT includes a pair of track)
- Order one EZJ joining kit for track lengths over 20 feet (Includes joining mechanism for both sections of track)

FREESTYLE® WORKSTATIONS
Prepare for a higher level of productivity.

Strength and durability...speed and efficiency...storage and workspace — it's all built in to an ergonomically designed workstation that will help your staff become more efficient and your operation more profitable.

- The ergonomic design maximizes usable kitchen space and provides added storage for packaging, smallwares, menus, ingredients, utensils and more
- An impressive total load-bearing capacity of 2,800 lbs.
  — each upper shelf has a 600-lb. capacity
  — bottom shelf capacity is 1,000 lbs.
- Plug and place steamers, microwaves, food warmers and other standard equipment
- Fast, easy cleaning of food prep surfaces and overall structure
- 30" deep stainless steel work surface provides plenty of area for prep work
- Open-base design delivers adequate space for a fridge under the work surface of the 48", 54" and 60" models
- Shelf and work surface heights adjust in 2" increments
- Add components or shelves without tools
- No front uprights for an uninterrupted work surface

Before you choose a workstation, consider why so many major national foodservice operations have turned to Freestyle® to improve storage, efficiency and productivity.

Freestyle® combines the versatility and flexibility of a freestanding unit while providing rock-solid strength and stability to support steamers, microwaves and other vital equipment

From the ability to add or reconfigure shelves quickly and without tools to the wide selection of accessories available — everything about Freestyle® is customizable.

Unlike most competitive units, Freestyle® doesn't require a bottom shelf for stability — freeing up floor space underneath for a refrigerator at a prep station or a safe at the Drive-Thru.

Storage is enhanced by virtue of a 2,800-lb. unit capacity... shelves that can be positioned in 2" increments...and shelf surface areas that are uninterrupted by front uprights.

EXTRAORDINARY EFFICIENCY

From preparing the order to staging and serving, SPG has a complete line of products to make your Drive-Thru service faster, more efficient and more profitable.

ISS™ Drive-Thru Workstation

• 30" x 60" baseline drive thru workstation provides the ultimate in organization, accessibility and workspace
• Minimizes time, motion and effort required to stage orders
• Comes with overhead storage area, condiment bins, lower storage shelving area — and open area to accommodate undercounter equipment needs
• Can also be converted to use our condiment tower and order stager system
• Choose from Plating Plus™, Grey Bond® or Gold Bond® finishes
• Also available in:
  18", 24", and 36" depths
  30", 36", 42", 48", 54" and 60" lengths

Model No. WST1363Y

For an assembled unit, add "A" as suffix to the model no.

NSF.

SPG's foodservice products are all manufactured to meet NSF standards. For specific items, visit www.nsf.org

Looking for more options?
See our Freestyle® workstation on page 38.

ISS™ Open Base Workstation

• 30" x 30" baseline multi-purpose workstation is ideal as a prep station, drive-thru counter, sandwich-making stand, or equipment stand
• Available in all standard depths and lengths
• Upper and lower storage shelving
• Choose from a wide array of posts, shelves, shelf covers and accessories
• Durable design with shelves rated to support 1,250 lbs. of uniformly distributed weight
• Features Gold Bond® finish and a 10-year warranty against corrosion
• Available in a variety of essential sizes

Model No. WTO3030Y

For an assembled unit, add "A" as suffix to the model no.

SUPERIOR SELECTION

SPG offers all kinds of carts in a wide range of sizes, styles and materials — including stainless steel, aluminum, wire, steel and plastic — all designed to deliver better performance, efficiency and economy.

Kelmax Rocket Cart

Sure to be one of the most used pieces of equipment in your organization, this incredible workhorse can be reconfigured quickly and easily to handle a wide range of jobs.

• Ergonomic and space-saving design improves stocking efficiencies and maximizes labor savings
• Galvanized steel construction provides strength, durability and an extended service life
• Vertical supports and shelf collapse and fold in to allow for nesting of several units to conserve valuable backroom space
• Split shelf design makes it easier to stack product
• Dual shelf designed to handle a variety of package sizes or provide a flat, stable work surface
• Compact design reduces aisle congestion and promotes safer, easier shopping experience for customers
• Includes a convenient pull handle, paper towel holder, and a hook to hang a trash bag

Model No.	Overall Dimensions	Weight

INSPIRED INNOVATION

The patent-pending design of our Collapsible Nesting Pan Rack is incredibly space-efficient...and representative of the kind of thinking that goes into all SPG racks.

Featured in the NAFEM showcase of innovative products

Kelmax Collapsible Nesting Pan Rack

• Patented design collapses into "V" shape for nesting and easier transporting of multiple racks
• Fully collapses to reduce storage footprint by 50%
• Unique, locking hinge mechanism creates exceptional strength and rigidity
• Rugged, welded aluminum design, heavy-duty tray slides, and reinforced gussets for maximum durability
• 5" polyurethane casters for optimum maneuverability
• Holds eighteen 18"x 26" pans with 3" spacing between tray slides
• Optional 304 Series stainless steel construction is available for specialized applications

SPG: Your Source For Oven Racks

SPG offers oven racks for all of the industry's most poplar oven brands, including: Hobart, Revent, Baxter, Adamatic, Lucks and Bakers Aid.

• Aluminum or stainless steel construction
• End-load, side-load, and double-side load configurations
• A variety of spacing and capacity options
• A selection of high-temperature casters options

THE RIGHT RACKS

From enclosed cabinets and steam racks to can racks and dunnage, SPG offers a vast selection of storage systems designed for specific tasks — and to help your operation run more smoothly and profitably.

Kelmax Enclosed Cabinets

- Great for areas where cabinets will be in public view such as hospital hallways or dining halls
- Tray spacing on 1" or 1-1/2"
- All welded units with double pan tops
- Door opens 270 degrees on stainless steel hinges
- Stainless steel gravity latch is drilled for padlock
- Heavy-duty models have reinforced center supports and standard 5" x 2" casters

INSPIRED INGENUITY
We not only imagine products that create efficiencies, improve productivity, cut costs and reduce employee injuries — we build them, too.

Both the Universal® Stainless Adjustable Ergo Table and Deli Slicer are designed with a fold-away hydraulic crank — so the work surface can be raised or lowered quickly and easily. As a result, these innovative tables provide a customized fit for each employee — to improve staff comfort, increase productivity and optimize efficiency.

Featured in the NAFEM showcase of innovative products

WHAT'S HOT! WHAT'S COOL!

Universal® Stainless Adjustable Ergo Table

- Quickly, easily adjust table surface heights from 30" - 42" or from 34" - 40"
- Uses 100% food-safe hydraulic fluid in a closed-loop system
- All models feature bullet feet, and can be ordered with casters by adding the suffix C to the part number.

STORAGE PRODUCTS GROUP

Universal® Stainless Modular Counter System

SPG can customize an integrated counter system that's perfectly tailored to your space and your work processes. Seamlessly integrated top-of-the line materials combined with ergonomic design create a system that maximizes utility, optimizes workflow, improves storage and promotes a clean, organized workspace.

The modular counter system will deliver the lowest cost of ownership and drive staff productivity in every area of your operation — including:

• Drive-Thru
• Dining
• Food Prep
• Bakery
• Front Counter Operations

Among the many features we can incorporate into your system are:

• Tables, open bases, cabinets, side panels
• Wire or solid shelving
• One-piece tops — flat, marine edges or even configured for natural stone
• Integrated drip-trough and spray grommet
• Easy access to electrical, plumbing, data services
• Sectioned base that allows custom configurations of equipment and shelving
• Integrated trash section
• Sink bowls
• Backsplash receptacles
• Cut-outs for drop-ins

— or just about any other option you require.

For the ultimate in efficiency, flexibility and productivity, contact your SPG representative for more details.
THE PINNACLE OF PRODUCTIVITY

All SPG prep stations and work centers are ergonomically designed to put tools and supplies within easy reach of your staff...deliver maximum storage...feature large work surfaces...and maximize the productivity of your operation.

ISS™ 72-In. Prep Station

- Combines strength and durability with the ultimate in accessibility and ergonomic design
- 18" deep wire and stainless steel shelves, 30" x 66" stainless countertop and channel dunnage shelf
- Accessories include grid baskets, scoop holder, pot hook and more
- Gold Bond® finish for years of durable service

UNIVERSAL UTILITY

Universal® Stainless sinks are available in a huge variety of sizes and configurations — from mobile sinks to hand sinks to compartment sinks with one to four bowls. Manufactured to fit any space ... accessories to satisfy every operational need.

Universal® Stainless Mobile Hand Sink

This is a complete, totally self-contained unit, requiring only a 110V/20-amp power source to operate.

• Promotes food safety, staff hygiene, adherence to HACCP principles
• A spacious 26" x 24" x 36" cabinet base with a 16-ga. stainless steel top and 18-ga. body
• 8" back and side splashes
• Four locking casters to provide mobility
• Powerful 115V UL listed water pump
• Mini™ 2 at 110V/15 amp tankless in-line water heater
• A faucet that blends hot and cold water
• 110° F water supplied at .32 GPM
• Paper towel holder and soap dispenser
• 5-gallon clean tank plus a 6-gallon waste tank
• 10' cord with GFI plug to wall/power source
• Optional end splashes available, contact your rep

Universal® Stainless 3-Compartment Sink With 2 Drainboards

• Available in 16-ga. (N Series) or 14-ga. (SL-Series) 300 Series stainless steel construction
• Fully fabricated bowl with full metal thickness throughout for greater strength
  than a drawn sink
• 9" high integrally formed backsplash, with 2" return to wall at 45°
• 2 -1/2" high, 180° sanitary rolled rim at all free edges
• Leg assemblies are located directly under sink bowls for greater load support
• Legs are 1-5/8"diameter tubing with adjustable bullet feet
• N-Series have galvanized legs; SL-Series feature stainless steel legs and crossrails
• Where applicable, crossrails are 1-5/8" diameter — coped and fully welded for maximum durability
• All corners are covered at 5/8" radius, welded and polished to form a one-piece sanitary unit
• Comes with basket drains and 1-1/8" faucet holes punched in backsplash on 8" centers as required
• NSF listed and CSA certified

SPG has a complete line of casters to keep your business on a roll.

Casters are available in plate, threaded stem, square stem and round post mountings. When selecting casters, consider capacity, the maximum weight the caster will need to support as well as size, fastening, flooring and environmental conditions. Wheel materials are solid rubber, polyolefin, polyurethane and phenolic.

Rigid Plate Caster

Caster Material Guide

Here's a brief overview of the four main types of caster wheel types:

Polyurethane
• Tough abrasion resistant
• Excellent floor protection and ease of rolling
• Wide temperature range -30° F to 180° F

Resilient Rubber
• Resilient casters are great for use on rough flooring
• Long lasting performance, quiet and economical

Polyolefin
• Good general use hard plastic casters
• Good on concrete surfaces

Phenolic Material
High temperature material for use in ovens up to 550° F
