# FREESTYLE® PRODUCTION LINE SYSTEM

## Revolutionize Your Kitchen with the SPG™ Production Line System

The SPG™ Production Line System possesses unparalleled levels of productivity and user-friendly design. The modularity and flexibility of the infrastructure allows for future equipment and component integration. The SPG™ Production Line System offers the same cantilever shelving system found on standard Freestyle® shelving, but with a layout specifically created to revolutionize restaurant cooking areas. The units come complete with a durable Freestyle® frame to suit any storage and equipment needs. Add cooking areas, appliances, extra shelving, toasters, compact refrigeration, and accessible product storage without compromising its prep area footprint. In addition, here is what the unit can offer:

- Easier and more efficient installation than a standard stainless prep unit
- Removable and replaceable shelving for easy cleaning under and behind the unit
- Expandable design to maximize floor area efficiency
- 2" shelving increments for ergonomic design and accessibility
